# Resilient DDoS Protection as a Service.

With our cutting-edge technology and state-of-the-art infrastructure, we are committed to providing reliable and efficient DDoS protection services to businesses and individuals of all sizes.

- ✓ **Global Anycast** – our Network is based on Anycast routing, improving latency and reliability by directing traffic to our closest Point of Presence.
- ✓ **Always-on protection** – using our remote DDoS protection, your service will only receive legitimate traffic. All attacks are detected and mitigated in realtime on our edge.
- ✓ **Free to use** – using our Game Shield's Basic plan, you can enjoy all the essential features of our service without spending a dime.
- ✓ **Fully customizable** – with a user-friendly Panel and intuitive design, you don't need to be a tech expert to make the changes you need.
